This directory is available free-of-charge to ConEx 2011 participants and exhibitors/sponsors. Limited copies will be made available after the ConEx for Php 1,000 per copy at the UAP National Headquarters. 53 Scout Rallos St., Diliman, Quezon City with telephone numbers (+632) 412 6364, 412 3342; fax number 372 1796.
On behalf of the United Architects of the Philippines (UAP), it is with extreme pleasure that I extend my warmest greetings and my best wishes to all the participants, organizers and sponsors of the 37th UAP National Convention of Architects (NatCon 37) and Convention Exhibits (ConEx 2011) to be held on April 27-30, 2011 at the SMX Convention Center, Pasay City.

The new millennium is confronting the tension between the forces of globalization, which has been widely debated as a distinguishing trend of the present moment, and its impact on local architecture and the efforts to ensure local identity and distinctiveness through architecture, where globalization is seen as a multidimensional phenomenon. We even find ourselves at the center of two opposing forces existing as a result of past or present contrasting cultures and architectures, along with their attendant values and methods of expression.

Hence, with the theme “Reinventing S.O.A.: Service-Oriented Architecture,” this Convention is propitious and significant in this rapidly changing and competitive environment where there is a need for concerted effort to find ways to assert both the potentials of new technology and new concepts represented in globalization and its contribution to the development of the built environment. This Convention aims to grasp the connections with the past, as well as the novelties of the present, to capture both the continuities and discontinuities of identity and modernization in order to make sense of our current predicament, consequently, a reinvention is necessary.

Since our organization is not any one person or affiliate but is a collage of our differing needs hence in this Convention we need to seek to perpetuate what we do best while attempting to accommodate ideas and views from our peers at the same time. It is indeed necessary to associate our thinking with adaptation of technical innovations in order to absorb and integrate them into a meaningful cultural system and to transform them from being just huge technical projects into a realization of our consciousness and maturity of vision, of our true identity deeply rooted in our history and heritage, where new models of built form and of direct interaction with the traditional modes of building need to be established.

We do not promise to give you the best three days of your life. Rather, we aspire to give you three days that will be an enduring part of your life not only for the memory of the 37th UAP National Convention but also because of present administration’s desire to truly redefine service to members.

RAMON S. MENDOZA, FUAP
National President
It is with great honor and privilege that I extend my sincerest gratitude to the delegates and allies of the United Architects of the Philippines (UAP) as we celebrate the 37th National Convention of Architects at the SMX Convention Center from April 27-30, 2011.

Service-Oriented Architecture is a buzzword and topic for many discussions in nearly every professional journal and conference. Opinions differ from “some technical rubbish” to “the technology of the future”. The problem about these different opinions partly depend on another problem: What precisely is S.O.A.? Whatever it is and will be, it seems to become the next step in the evolution of Philippine architecture.

Therefore, UAP endeavors to be at the forefront for making Service-Oriented Architecture a successful venture. Let this Convention cement the position of UAP in the so-called “S.O.A.”, which is seen as a new type of architecture that defines the how-to of assigning interfaces in a servicing way so that these services can be used in making policies that affect building design and act as a tool to assist Architects in promoting more sustainable building practices.

May this convention, therefore, impart the desired skills and competency as we look forward to more shining moments for Filipino architects as we venture into “S.O.A.” With the concerted efforts of the organization, we can confidently meet the future with dedicated, competent, ethical and socially responsible professional architects that imbibe the qualities of leadership, authority, accountability, stewardship and transparency.

Welcome to the 37th UAP National Convention. Mabuhay tayong lahat!

Mabuhay!

On behalf of the Organizing Committee of the UAP Convention Exhibits (CONEX) 2011, I am very pleased to welcome you all to the 37th UAP National Convention and its grandest exhibition...the ConEx 2011.

The rapid movement of growth and development nowadays are pervasive. We have all witnessed the emergence of science and technology-based developments. The application of information technology, efficient designs, ecological issues, new energy options and a humane approach are likely to be part of the evolution.

Traditionally, UAP CONVENTION EXHIBITS aims to support our friends in the construction industry by developing an appropriate market setting to enhance their sales productivity, open such opportunity to public with an accommodating place for interaction, renewing contracts with clients, winning new clients, generating market presence, launching products, raising product awareness, sharing information, ascertaining client needs, influencing client decision-making, and finally closing deals.

The whole organizing committee of UAP ConEx 2011 hopes that the synergy arising from this exhibition will energize current activities as well as spur further professional relationship among allies. Also, we hope what has been planned will make the next few days enriching and worthwhile for you. Of course, we are looking forward to joining you at some more of the events during the convention and exhibition.

Once again, we would like to take this opportunity to thank you for your support and cooperation and wish you a successful participation.
**Opening of Exhibits**

**Day 1 • 28 April • Thursday**

A. GENERAL RULES AND REGULATIONS: SMX CONVENTION CENTER

1. IDs must always be worn by exhibitors and contractors throughout ingress to egress while in the premises of the exhibition hall. “No ID, No Entry” policy will be strictly implemented.

2. Food and drinks are not allowed to be brought inside the SMX Convention Center premises.

3. Smoking is not allowed within the premises of the SMX Convention Center.

4. Proper dress code must be observed at all times. Wearing of slippers, sleeveless undershirt or “sando” and/or other inappropriate attire is not allowed. Business attire is required.

5. Strictly no firearms or deadly weapons are allowed inside the exhibition hall.

6. Unruly behavior inside the premises is strictly prohibited.

7. Cooking is not allowed within the exhibition hall unless this is with prior approval from the Event Organizer.

8. Only SMX accredited caterers may provide food and drinks inside the exhibition hall. Please contact the Event Organizer for more details.

9. Exhibitors shall not use nor permit the use of any portion of the SMX Convention Center premises as sleeping or living quarters or uses the same for illegal purposes.

10. The Event Organizer and/or the Venue Management reserve the right to regulate the volume of music and/or sound system within the hall which interferes with the activities of neighboring exhibitors.

11. Entries, passages, hallways and corridors of the building shall not be used by exhibitors or their personnel for any other purpose than for ingress and egress.

12. Freight and Service Elevators are designated for transportation of materials and equipment. Escalators and passenger elevators are for passengers only and may not be used to transport freight or equipment.

13. Exhibitors shall not place or allow anybody to place any merchandise or install, attach or incorporate any structure annex or work of any kind, protruding from the premises. Violation of this provision shall give the Event Organizer the right to remove merchandise, structure, etc. without need of notice and all expenses incurred shall be for the account of the exhibitor.

14. Exhibitors shall not paint, drive nails, screws or abutments on the walls or frames nor post any indecent, immoral or objectionable inscription nor make alterations, improvements or changes in any part of the exhibition hall, including electrical installation, plumbing and other fixtures without prior written approval from the Event Organizer.

15. Exhibitors shall not use or store within the exhibition hall inflammable or explosive materials or gas-fueled appliances in any form or quantity, nor do any act which may expose the venue to fire or increase the volume of fire hazard, or change the insurance rate of the building, it being understood that should the exhibitor do so, he shall be responsible for all the damages which such violation may cause the Event Organizer, Venue and/or its other exhibitors aside from the exhibitor’s other liabilities under its booth rental contract.

16. Gambling in any form and/or games where sums of money are at stake shall not be conducted within the exhibition hall.

17. Storage of machineries, equipment and other properties of exhibitors in the common areas is strictly prohibited.

18. Appropriate protection must be placed on the floor before fountains, ponds, waterfalls or other water features are installed. Installations...
must be monitored by the Event Organizer and the Official Booth Contractor.

19. Decorations and signages may not be taped, nailed or otherwise fastened to any permanent surface. Adhesive-backed decals or stickers may not be placed on any surface of the building. The use of floor decals is subject to approval based on other events in the building and the protection of the floor surfaces. Glitter or confetti may not be used in carpeted areas of the building.

20. Helium-filled balloons may not be used or distributed in the leased premises.

21. Animals are not permitted in the premises except in conjunction with an approved exhibit, as service animals for persons with disabilities or to assist law enforcement personnel. Animals that are approved must be on a leash, within a pen, cage or other similar control. The owner is fully responsible for obtaining all appropriate permits and for all sanitary needs of the animals.

Note: The Event Organizer reserves the right to refuse admission of or dismiss anyone from the hall without any reason. This ruling applies during ingress, the exhibition proper and egress.

B. GENERAL RULES AND REGULATIONS: ADMISSION

1. EXHIBITORS’ ID

Exhibitor’s ID will be issued to exhibitors, free-of-charge (only up to the entitled number of ID’s) for admission purposes into the exhibition hall throughout the ingress, show proper and egress days. Additional ID’s may be secured at a minimal cost. Please submit your required number of IDs and return this to the Event Organizer before the stipulated deadline. Please use Form No.5 and must be submitted at the stipulated deadline.

Exhibitors’ IDs are to be collected at the Event Organizer’s temporary office on-site during ingress. Please note that exhibitors must wear their IDs at all times during the ingress, show proper and egress days while they are in the exhibition hall. Request for replacement of lost exhibitor IDs may be arranged at One Hundred Pesos only (P 150.00) per piece.

2. CONTRACTORS’ PASSES

For the purposes of construction and the moving in of exhibits, contractor passes will be issued by the Event Organizer permitting the exhibitor’s ingress crew, and approved outside contractors and their workmen to enter the exhibition hall. These passes will be used only during the ingress and egress dates. These identification passes must be worn at all times while inside the exhibition hall. Lost passes will automatically forfeit the deposit given. If a contractor has a valid reason to be present during the exhibition show dates (e.g. maintenance or remedial purposes), only a minimum number of special passes will be issued upon request. However, the Event Organizer reserves the right to prohibit any contractor from using any pass into the exhibition hall.

3. VISITOR’S COMPLIMENTARY PASSES AND REGISTRATION

All trade visitors will be required to complete a registration form prior to admittance in the exhibition. This will enable the Event Organizer to record a full and comprehensive attendance of visitors. Complimentary passes/invitation mailers will be issued to exhibitors up to its entitlement which may be given out to their clients and invited guests.

4. DELIVERY VEHICLE PASSES

Only delivery vehicles with vehicle passes prominently displayed on their windshields will be allowed to unload exhibition materials at the loading bay. These delivery vehicle passes may be reproduced/photocopied by the exhibitor based on their actual requirement. The basement parking may be used for delivery trucks that need to park after unloading exhibit goods and materials with a corresponding parking fee. Car park vertical clearance is 2.4 meters.

5. GATE PASS

Exhibit items/materials must be listed on the GATE PASS FORM for inspection prior to entry. If the space provided in the gate pass form is not enough, a separate list/delivery receipt where the exhibit items/materials are listed may be attached. Forms must be completed in TRIPlicate (please photocopy as needed). The delivery entrance guard and the exhibitor must have one copy each. Only Event Organizer -signed gate passes for both ingress and egress will be honored.

Important: Please ensure that the exhibitor’s copy is secured as this is the same copy to be used and surrendered during egress.

C. GENERAL RULES AND REGULATIONS: PARKING PASSES DURING SHOW DATES

The basement parking is open to the general public with a fixed fee per entry. As such, the Event Organizer and/or SMX Convention Center Management cannot be held liable for damages or losses incurred even when drivers or car owners have specifically informed the roving guard on guard of its presence. The guard’s responsibility lies primarily in the enforcement of the regulations of SMX Administration regarding traffic, parking and molestations from unauthorized people.

Prepaid special car passes valid for the SMX basement parking will entitle EXHIBITOR VEHICLES to have unlimited entries and exits daily (valid only during show dates) at only P 200.00 per pass for four (4) days. This may be claimed at Event Organizer’s office during ingress. This special car pass does not guarantee availability of parking space at the basement and will still be subject to a first come, first served basis. Please present this car pass to the Cashier prior to entry. The Cashier will issue a complimentary ticket and stamp on the car pass. Please surrender the complimentary ticket to the Exit Guard. Lost PARKING PASS will be charged a penalty of P150.00 plus the regular parking fee of P 200.00 per pass.

D. GENERAL RULES AND REGULATIONS: SECURITY DURING SHOW DATES

1. General security will be provided by the Event Organizer. Exhibitors and their staff will not be allowed in the exhibition hall beyond the official exhibition hours.

2. All personnel in the exhibition halls must wear identification Exhibitor ID.

3. For security and safety reasons, exhibit movement, whether in or out of the hall, during show hours is not permitted.

4. Strictly NO PERSON INSIDE THE EXHIBIT DURING OFF SHOW TIME.

5. Exhibitors are not allowed to proceed with egress earlier than the specific time stipulated for egress.

6. Exhibitors are advised not to leave booths unattended during ingress, show proper and egress, as these are the most vulnerable period for theft. Exhibitors are also advised to take particular care of personal belongings.

7. During exhibition dates, it is highly advisable for the exhibitor to assign a representative to be at their booth one (1) hour before
the official exhibition hours (8:00 a.m. on the first day for last minute booth touch-ups and at 9:30 a.m. on succeeding show days) to ensure that their exhibit displays are safeguarded considering that other exhibitors who intend to prepare their booth will be allowed entry into the exhibition hall at that time.

8. Upon leaving the exhibition hall after the exhibitor has finished setting up its booth or at the end of each exhibition day, it is advisable to properly secure its booth by installing covering by its entrance or using other means which the exhibitor deems fit depending on their display.

E. GENERAL RULES AND REGULATIONS: FIRE PRECAUTIONS & DANGEROUS MATERIALS

Exhibitors who, because of the nature of their exhibits, require a special type of fire extinguisher must make arrangements at their own cost for the provision of such equipment. Any person, on seeing an outbreak of fire, however slight, must make immediate use of the fire alarm system and subsequently make every endeavor necessary to extinguish the outbreak or to confine it by the use of an extinguisher and/or removal of the goods in the vicinity. No temporary gas or extinguish the outbreak or to confine it by the use of an extinguisher and/or removal of the goods in the vicinity. No temporary gas or electrical fittings may be used in the exhibition hall. No explosives, petroleum, dangerous gases or highly flammable substances are allowed in the hall.

F. GENERAL RULES AND REGULATIONS: STORAGE AND BOOTH CLEANING

There are no storage facilities inside the exhibition hall for packing cases and other equipment/properties of the exhibitor. Fire regulations prohibit such storage on stands. Arrangements for safe keeping of such items must be with the Exhibitor’s responsibility. All fire exits should also be free from any obstruction. The exhibitor shall bear full responsibility in the event of any mishap whatsoever.

During exhibition days, the Event Organizer will be responsible for the cleaning of gangways daily. For exhibitors with subcontractors, it is the responsibility of the latter during ingress and egress to clean it, however slight, must make immediate use of the fire alarm system and subsequently make every endeavor necessary to extinguish the outbreak or to confine it by the use of an extinguisher and/or removal of the goods in the vicinity. No temporary gas or electrical fittings may be used in the exhibition hall. No explosives, petroleum, dangerous gases or highly flammable substances are allowed in the hall.

F. GENERAL RULES AND REGULATIONS: STORAGE AND BOOTH CLEANING

There are no storage facilities inside the exhibition hall for packing cases and other equipment/properties of the exhibitor. Fire regulations prohibit such storage on stands. Arrangements for safe keeping of such items must be with the Exhibitor’s responsibility. All fire exits should also be free from any obstruction. The exhibitor shall bear full responsibility in the event of any mishap whatsoever.

During exhibition days, the Event Organizer will be responsible for the cleaning of gangways daily. For exhibitors with subcontractors, it is the responsibility of the latter during ingress and egress to clean the exhibitor’s respective area as well as build, dismantle and remove materials from the exhibitor’s booth.

G. UTILITIES AND OTHERS

1. FLOOR LOADING CAPACITY

The maximum floor loading capacity is 250 lbs/ft². Special arrangements, including the provision of a base (steel) plate, may be required for any exhibit exceeding this limit. The Event Organizer must be informed of any such exhibit. The delivery schedule for heavy and large exhibits must be strictly adhered to.

2. DAMAGE TO STAND STRUCTURES

No person under any circumstances shall cut into or through any floor covering or wall, or alter any booth service structure. Any such damage to the booth service structure is fully under the liability of the exhibitor.

3. ELECTRICAL INSTALLATIONS

a. Power Supply

<table>
<thead>
<tr>
<th>Lighting Level:</th>
<th>Total Power Provision:</th>
</tr>
</thead>
<tbody>
<tr>
<td>112,500 lumens</td>
<td>2,800A for 220V, 225A for 460V</td>
</tr>
</tbody>
</table>

b. All electrical mainline connections to booths must be carried out or inspected only by the Official Booth Contractor.

Connections and distribution within the booth/stand may be made by the exhibitor or its subcontractor. The additional number and type of electrical fittings and installations required must be indicated by the exhibitor.

c. No flashing light or signs will be permitted unless forming an integral part of an exhibitor’s product. Sequence-lit displays will be subjected to the approval of the Event Organizer. Decision will be based on the rate of light change. No electrical installation and fitting may be suspended from the ceiling of the exhibition hall or be fixed to any part of the building structure. No fitting may project beyond boundaries of the site allocated.

d. The Event Organizer reserves the right to disconnect the electrical supply to any installations, which in the opinion of the electrical consultant is dangerous, and is likely to cause annoyance to visitors or other exhibitors and/or is not applicable to Philippine Safety Standards.

4. FURNITURE AND AUDIO-VISUAL EQUIPMENT

Each exhibitor occupying a shell scheme booth is provided with 1 information table and 2 chairs as part of the booth package. They are also allowed to bring in audio-visual equipment inside the hall, however, exhibitors who intend to rent additional furniture or audio visual equipment may do so. This is subject to availability of the requested item. The exhibitor must submit the request form on/before the stipulated deadline.

5. TELEPHONE

Telephone services are available at the business center. Exhibitors may also rent temporary telephone lines through the Event Organizer by filling out the enclosed FORMS (See Form 9-A). Full payment should be first settled before the telephone installation.

6. DAMAGES

Exhibitors are responsible for the cost of replacing or repairing any damages or dilapidation to the exhibition premises and booth specifications caused by themselves, their agents, their contractors or by any person/s employed or engaged on their behalf. The cost will be assessed by the official contractor and will be charged to the exhibitor. The Event Organizer, together with the Venue Management, will inspect the hall before and after the exhibition.

7. UNFORESEEN OCCURRENCES

In the event of any occurrence not foreseen in this Exhibit Guidelines, Rules and Regulations, the decision of the Event Organizer shall be final.

8. DISPUTE SETTLEMENT

In the event of a dispute, the Event Organizer shall exercise the right to handle matters in the interest of the exhibition concerned. The decision of the Event Organizer in any problem or dispute will be final.

9. FORCE MAJURE

In the event that the exhibition is postponed, shortened or extended due to any cause beyond the control of the Event Organizer, the Event Organizer shall not be held responsible for any loss obtained by the exhibitor. Such causes may be directly or indirectly attributable to the elements of nature. Under such circumstances, the money paid by the exhibitors, or any part thereof, is refundable at the sole discretion of the Event Organizer.

Eleksis Home Sound Solutions

When it comes to Home theater, your TV is only half the story. Complete the experience with Bose because what you hear should be as compelling as what you see.

Lifestyle® V35 home entertainment system

The Bose® Lifestyle® V35 home entertainment system delivers vivid, theater-like sound that brings movies, sports, video games and music to life. And it’s designed to let you enjoy that experience more easily than ever before.

Fill your home with music

Bose® link extends the performance of your system to the places you listen most—the kitchen, the bedroom, around the yard. Simply connect Bose link-compatible products to experience quality sound in a second listening area.

Wave® music system

The acclaimed Wave® music system still sets the standard for quality audio and ease of use among one-piece, table top radios and bookshelf stereos.

251® environmental speakers

Our best wall-mount outdoor stereo speakers deliver balanced stereo sound over a much wider area than most conventional outdoor speakers.

Visit www.eleksis.com for a full selection of sound solutions.

NOW AVAILABLE IN THE PHILIPPINES -- The ONLY 100% WATERPROOF laminate flooring...

Now you can laminate in places never thought possible without fear of swelling, warping and deformation.
Choose the best floor finish
only from Bona
Passion for wood floors

With BONA, these eco-friendly water based floor finishes will give your floor an alluring sheen; a much gentler way to maintain your wooden floors natural look. Bona products protect your flooring from yellowing, peeling, scratches and scuff marks. BONA is definitely a sure way to achieve durable protection for your wooden floors. From Bona seal (Prime) to Bona topcoats (Novia, Mega, and Traffic) all are 100% water based polyurethane.

BONA is sure to provide a unique character for your wood floors leaving it naturally beautiful and naturally safe.

- Plasticizers / Superplasticizers
- Cement Grinding Aids

DAVIES TECHNICAL SOLUTIONS, INC. (*Daviestech*) provides high quality and cost-effective construction and maintenance solutions. We specialize in Waterproofing, Floorings, Coatings and Admixtures.

Established in 2003, *Daviestech* took over the entire Waterproofing and Industrial Flooring business of Jardine Davies Inc. Combining state-of-the-art product lines and top-notch services, we have been serving the country’s top establishments in both the new construction and retrofit market with close to one million square meters of specialty systems installed.

Our list of clients include many of the country’s top establishments in the food, beverage, pharmaceutical, electronics, chemical and allied processing industries. We also serve commercial and institutional accounts such as retail malls, supermarkets, warehouses, schools, banks and hospitals.

In 2010 *Daviestech* was appointed by Bostik Philippines as exclusive distributor of their liquid admixture line. With a dedicated technical staff, Davies now provides solutions for cement manufacturing and concrete batching plants.

*Daviestech* is committed to ensuring total customer satisfaction. We aim to maintain long-term business relationships built on a high level of confidence in our products and services. To fulfill this goal, we strive to continuously improve our products and processes.
a green legacy, 
a green future.

Dunn-Edwards has a green legacy that makes us proud and inspires us to do more - as green as our laurels may be, we are not content to rest upon them. We are dedicated to continuous improvement in our green performance. The word "green" is related to the Old English word that means "to grow". Our goal at Dunn-Edwards is to grow greener day-by-day - greener by design™ - in what we hope will be a greener world where everyone can flourish.

It has been our practice to voluntarily initiate policies that safeguard the health of our customers, employees and the public, as well as the quality of our environment. Dunn-Edwards decided to discontinue the manufacturing of lead-based paint products in the early 1950’s, more than 25 years prior to the federal regulation ban. In the 1970’s, we reformulated all our water-based paints to eliminate the use of biocides with mercury content, long before the EPA imposed limited ban in 1990. We replaced ethylene glycol (a toxic substance) with FDA approved propylene glycol in the early 1980’s.

Our commitment to being environmentally aware extends from maximizing the performance of our paint to ensuring that our process of manufacturing is as eco-efficient as we can make it. Dunn-Edwards is constantly working hard to find ways to lessen our impact on the environment.

**Laser Level**

**Features:**
- Automatic self-leveling
- Remote control offers scanning, speed control, slope setting and alignment control for fast one person setup
- IP54 environmental sealing
- Military type body; can withstand a drop of 1 meter (3 feet) onto the concrete
- Battery life: 70 hours

**MODEL HV101**
Applications:
- Acoustical ceiling installation
- Drywall installation
- Interior squaring / layout
- Vertical alignment
- Interior finishing work
- Outdoor short range general construction leveling and aligning
- Outdoor elevation transfer work such as septic tank installation

**MODEL LL100**
Applications:
- General elevation control
- Checking and setting elevations for smaller job sites
- Levelling forms and footers
- Estimating cuts and fills
- Ideal for decks, terraces, pools, and septic
- Systems
- Basic slopes for driveways, ramps, and residential drainages

HCG’s High Efficiency Toilets (HET) 3/4.8 LPF deliver powerful flushing of up to 40% less water. The secret lies in its innovative engineering, its enlarged flush valves, siphon jet hole and glazed trapway help to increase the momentum of gravity fed water, thus creating a powerful flush. Given their low water consumption feature, these High Efficiency Toilets (HET) prove that less can be more.

HOME IDEAS

THE GREAT ZEN

ISSUE Part 1

This special Zen edition of Home Ideas has long been awaited by its many followers for sometime now. A fantastic compilation of Zen inspired residences – Home Ideas presents over 20 beautiful Asian inspired designs with functional lay-outs and clean streamlined designs of concrete, steel and glass. The symmetrical and asymmetrical balance of each design is very well presented in the many Zen influenced residences for the selection of the new homeowner looking for that composition which best characterizes his personality.

With the very good showing of Volume 26A&B with the modern design of its front cover Volume 27A&B promises to be even more interesting and full of home design options of Zen together with the more popular Home Ideas designs of Mediterranean, Contemporary, Spanish influence, French Contemporary, Philippine, and American as well as English designs.

Fixed, Manual Telescopic & Automatic Rising Bollards
High Security Anti-Terrorist Bollard/ Vehicle Barrier Systems
For Access Control, Traffic Management & Perimeter Protection

LAI YEW SENG PTE LTD started in 1972 as a specialist contractor in structural steel fabrication and installation works. Over time, we have nurtured and diversified into other businesses offering services and products related to Interior Design & Renovation, General Building Works, Building Cladding Systems, Physical Security, Access Control and Traffic Management.

We are an exclusive distributor and Local manufacturer of ATG ACCESS LTD (UK). ATG is one of the world’s largest manufacturers of access controls and anti-terrorist vehicle barrier systems. Whether you’re looking for a simple manual pull up post for a driveway, some manual telescopic security bollards, an intelligent automatic bollard system or a PAS 68 or DOS K rated anti-terrorist bollard arrangement, we have a product available to suit your needs.

A dedicated distributor’s network spread across 24 countries worldwide ensures the customer the proximity of an ATG expert to recommend the products best suitable to the special needs and an experienced team to execute the projects effectively backed by strong after sales service support.

While, ATG Shallow Mount Technology has revolutionised the bollard industry since last 4 years proving invaluable within city centres and other places where underground services are below every highway and byway; continued development of the products ensures that there is an ATG Shallow mount bollard available for every level of security and application. The latest development being a Double Telescopic Shallow Retractable bollard; which is successfully tested as per PAS68 7.5T @ 40mph (Equivalent to DOS K8 rating)

The recent acquisitions has further widened our product range and strengthened our market potential. Along with Bollards suitable for every kind of application and security level, we now provide a complete range of physical security products ranging, from Road Blockers to Vehicle Barrier Bars (VBB) barriers tested and certified by Department of States in USA.

Acoustic Problems?

Acoustics is an important design factor like lighting and cooling that affects comfort, yet it is often ignored or forgotten.

Architectural Aesthetic Solutions to Acoustics

- **Wooden Acoustic Panels**
  - Pant. Sizes: 1200 mm x 2400 mm
  - Thickness: 15 mm
  - Over 100 wood, plain or metallic finishes to choose from.
  - Available in Environment Friendly or Fire Rated, laminated or real wood veneer finishes.
  - Wide variety of groove spacings available and can be specified as absorber or diffuser.
  - Quick and easy to install "tongue and groove" system saves time and money

- **Wood Acoustic Boars**
  - Size: 800 mm x 800 mm
  - Thickness: 15 mm

- **PVC Wood Acoustic Panels**
  - Size: 1200 mm x 2400 mm x 10 mm
  - Available in 204 mm or 2000 mm x 16 mm
  - Waterproof for outdoor use

- **Polyester Panels**
  - Size: 1200 mm x 2400 mm
  - Thickness: 8 mm

- **Printed Polyester Panels**
  - Size: 600 mm x 1200 mm per panel
  - Thickness: 5 mm
  - Digital image printing is possible

- **Wooden-silk Panels**
  - Size: 600 mm x 1200 mm
  - Thickness: 20 mm or 35 mm

- **Fabric Panels**
  - Size: 600 mm x 800 mm
  - Thickness: 30 mm

- **Rhombus Panels**
  - Size: according to designer’s requirement

- **Aluminum Panels**
  - Size: 500 mm x 600 mm
  - Thickness: 2 mm

Local Projects:

- Wood & Fabric Panels Multi-Purpose Room
- Wood Panels Wall Fabric high quality

We supply Decorative Acoustic Panels, Motorized Screens, Audio Video Racks, Brackets, HDMI Cables, Home Theater Sofas, Auto Voltage Regulator, Line Conditioner & other Home Theater Accessories.

We do Home Theater Design, Consultancy & Custom Installation.

FLOORING
MB Tech offers a complete line of flooring solutions for a variety of industries. Floors are an integral part of any facility and it’s a must to select the correct type for each unique application. Each product has a long list of reference of its durability and reliability.

- Metallic & Mineral Powder Hardeners – “HARDETEC” & “MASTERTOP”
- Liquid Hardeners - “KURE N HARDEN”, “LAPILOTH”
- Epoxy Floors – “MB SEALTEC”, “MASTERTOP”, “NEOGARD”
- Polyurethane Floors – “UCRETE”, “FLOWCRETE”, “NEOGARD”
- Stamped Concrete – “STAMP MASTER”, “VALUECRETE”
- Concrete Stains – “KEMIKO”
- Rubber Floors – “TAWIN”
- Sports Floors – “REBOUND ACE”

WATERPROOFING
MB Tech supplies an array of products for waterproofing and masonry structures. Each product has been used extensively all over the world and has undergone the rigors of various climates. MB Tech’s Waterproofing products are the most dependable system in the market with complete technical support from our foreign principals.

- Cementitious capillary – “THOROSEAL”; “MB TECSEAL”
- Cementitious Slurry – “MB FLEXOSEAL”; “BARRALASTIC”; “BOSCOCEM”
- Polyurethane Waterproofing – “SONOGUARD”; “ULTRASeAL”
- Liquid Cold-applied Elastomeric – “HLM 5000”; “BOSCOSEAL PU”
- Elastomeric Paint – “MB COLORSeAL”

GROUTS
For precision machinery grouting and concrete surface and crack repair, MB Tech offers a complete line of cementitious and polymer based grouting materials. MB HARDFLOW Grouts are formulated to meet the application and in-service demands of the industry.

INSULATION
In terms of energy conservation, the value of thermal insulation is to form a barrier against heat & noise. In terms of high productivity, a sound waterproofing system is a must for a continuous and unabated operation. That is why MB Tech is offering a system that is both an Insulation and a waterproofing product. TOPFOAM Roof Insulation is a sprayable Foam insulation that is primarily used as Thermal & Acoustic Insulation because of its high R-value. Plus, it has the distinct advantage of sealing your roof to prevent any possible leakages.

SEALANTS
As one of BOSTIK’s authorized Dealer/Applicator, we have highly trained personnel in effectively installing this world-class product. BOSTIK has access to new and innovative technologies, which influence the development of products that are environmentally friendly and in-line with changing innovations.

AT LAST HERE’S THE REHAU

YOU CAN AFFORD!

With the new REHAU RAUTITAN, all the superior qualities of REHAU is now within your budget. Made from advanced and more durable polymer, Polyphenyl Sulfone (PPSU), Made in Germany REHAU is the last water piping system you’ll ever need.
No mistakes and interchangeable of sleeve is not a problem.
Makes the most sense, for your cents!

Hot and Cold Water Piping System
Paradise Chemical Corporation was established in the Philippines in November of the year 2000. They assumed the management of Sinclair Phils Inc., which was already one of the leading paint companies of the Philippines since 1952.

Today, Paradise Chemicals continues to produce the same quality paint, waterproofing and related chemicals under the Destiny brand name. These include the already well-known EpoPrime Water-based Epoxy Primer for concrete, Stuc-O-Life Flat Latex Paint, Elastomeric Waterproofing Paint and Decorcote Washout protection.

New innovative products were developed, such as Kooltex Heat Repellant Roof Paint, Bluseal Water-based Elastomeric Sealant, FlameShield Fire Retardant, Liquid Bond Cementitious Type Waterproofer and many others. Paradise also produces products under the Elegance Paints and Bingo Paints brand names.

Paradise Chemicals prides itself not only because of their high quality products but due to their all-out support to the paint, waterproofing and related chemicals markets, through seminars and jobsite field support.

--- PRODUCTS ---

**FLAMESHIELD FIRE RETARDANT**

Easy to apply solution for rendering wood, fabrics and paper material fire retardant. Delays ignition of wooden walls, eaves and ceilings, curtains, carpets and other fabrics when in contact with fire. Must be applied on bare, uncoated items, prior to painting. Recommended for homes, offices, hotels, etc.

**KOOLTEX HEAT REPELLENT ROOF AND WALL PAINT**

Roof paint that repels 50% of the heat of the sun. Cools home and building interiors and saves on airconditioning costs. Elastomeric. Water-based. Easier to install than insulation and repels heat while still outside the building. Results in electricity savings. Requires Kooltex Primer A (Water-based for roofs with existing paint or Kooltex Primer B (Solvent-based) for bare metal roofs.

**DESTINY ELASTOMERIC WATERPROOFING PAINT**

Elastomeric paint for concrete walls and ceilings. 60 bright colors. Brings life to exterior walls. 100% Elastomeric - No adulterations. Bridges cracks on concrete plaster. Prevents entry of water through the walls, ideal for firewalls. Water-based. No need to tint. Cheaper than tinted latex paints.

**EPOPRIME WATER-BASED EPOXY PRIMER FOR CONCRETE**

Most durable of all primers for concrete. 3 component epoxy. Epoxy glue adhesion. Penetrates into pores and hairline cracks, cures within and grasps the wall. Permanent. Becomes part of the wall. Topcoats last longer and stay looking new much longer. Alkali and chemical resistant. Protects topcoats from water and alkali attack from within the concrete. No need to neutralize the wall. May be applied on new concrete plaster even on the 3rd day after the plastering, provided dry. Cheaper in materials and labor and shorter construction time. Negligible long-range Cost per Square Meter per Year of service. Best primer for waterproofing coatings. Seals all pores to prevent water entry and exit. Waterproofs even on the negative side of walls, such as interior walls adjacent to other buildings and exterior of bathroom walls. Primer for concrete floor coatings and swimming pool lining. High coverage.

BECAUSE WE KNOW,
WHAT YOU REALLY NEED...
Protecting today’s homes & tomorrow’s world.

At Phelps Dodge, safety is how we grow our business. That means safety in how we make our products, the standards we set, and the way we innovate.

- We use earth-friendly, safe materials
- Our wires are guaranteed lead-free
- Our high-quality long-lasting wire means less waste, less landfills
- We practice environmentally responsible manufacturing processes
- We manufacture wires with low smoke halogen free insulation

It’s a commitment to keeping our homes safe for our families today, and our world safe for tomorrow’s generations.

One-time Investment, Lifetime Protection.

APRIL 28-30, 2011
SMX CONVENTION CENTER
RASA SURVEYING has been existent since 1995. RASA is continuing the legacy of providing comprehensive services of engineering relocation of boundaries, topography, consolidation and subdivision, verification, route alignment, parcelary, hydrographic, bathymetric, and global position fixing. The vision of continuously improving the standard output of surveying science through the usage of high-tech equipment and computers lives on to deliver a better, faster, and more accurate service. Our engineers and support staff have undergone rigid training from field data gathering to processing that elevates their awareness on computer literacy specializing in integrated survey systems.

As of today, RASA can safely claim that the company is technologically at par with the industry’s best. Its continued search for information technology with enthusiasm & vibrancy certain assures our clients of excellence in services and quality of work. We are both locally and internationally recognized by professional organizations namely, the Geodetic Engineers of the Philippines (GEP), Institution of Surveyors of Australia (ISA), Philippine Aggregation of Geodetic Engineers Consultants, Inc. (PAGEC), and the Mines Geodetic Engineers Incorporated that guides our work ethics and continuing education enrichments.

125 years of quality, innovation and trust in every Bosch power tool.

With a 125 year heritage of engineering know how and innovative power, we offer durable and reliable technology. Bosch Power Tools consistently develops products that increase work-efficiency and enhance quality of life. This year, we proudly celebrate our company anniversary and thank you all for your support and trust over all those years.

For professionals from professionals
THE REHAU ADVANTAGE

- Rehau Quality
  Leading uPVC Manufacturer of window profiles that sets high standards of product quality and workmanship.
- German designed for Asia Pacific
  Specially formulated to suit the global spectrum of climates and regions.
- Energy Saving
  With better insulation which prevents the transition of heat or cold from the outside.
- Best Protection
  Engineered with the best protection for your family and property in mind.
- Water Tightness
  Keeps inside absolutely dry however heavily it might be raining outside.

Sound Insulation
Perfectly designed to reduce sound transmission.

Self Extinguishing
Classified as a high impact resistant material difficult to ignite and will self extinguish.

High Wind Load Performance
Built to withstand the gushiest wind conditions up to signal #9.

No Rusting, No Corrosion, No Painting / Chemical Resistant
Rust proof and resistant to atmospheric pollution including a range of acids and alkalies.

Dust Proofing
Calibrated to achieve excellent air tightness that effectively stops dust drifting from the outside.

**NEW**

**TOUCAN WATERLESS Urinal**

This **TOUCAN WATERLESS URINAL** can save approximately 151,000 liters of water per year. For a small hotel that could mean saving 982,000 liters a year. A school with 500 male students could save 2.85 MILLION liters of precious fresh water a year. The savings are staggering!

The **DESERT CUBE SYSTEM** with its Natural Microbial Technology controls odours and build-up of uric scale. Cleaning is quick, easy, and maintenance free. It also reduces maintenance costs for urinal valves and water storage tanks.

The **DESERT CUBE** is 100% biodegradable, making it environment-friendly, unlike other waterless urinals which use **PLASTIC CARTRIDGES**, which eventually become waste in our environment.

The Ceramic Urinal Ware is locally manufactured - proudly Philippine made, while the “cube” is made in Australia.

---

**Tech Dimension**

- **Product Code:** U42012 WL
- **Category Model:** Institutional
- **Nominal Dimension:** 406mm x 626mm x 280mm
- **Material Grade:** Grade A Vitreous China
- **Accessories includes:**
  a) Ceramic Strainer
  b) Urinal Bracket with Screws and Taps
  c) Desert Cube (approximately 1500 usage per cube)

**YOUR PARTNER IN ARCHITECTURAL BUILDING HARDWARES**
Eldorado Stone represents our most popular brick and stone veneers created over the last 35 years. With a wide selection of shapes, colors and textures our Classic Brick and Stone offers an incredible variety that will compliment all types of design applications.

Visit us online at www.eldoradostone.com/pacim for the latest information and inspiration on Eldorado Stone... “The Most Believable Architectural Stone Veneer in the World.”

Because Eldorado Stone replicates natural stone, variations should and can be expected.

The appeal and attraction of real thing.

Pantaron provides the beauty and magnificence of natural stone into any concept or design which cannot be matched or achieved by any other building material. Comes in a diverse range of individual sizes and pre-assembled patterns allowing freedom in design and an ease of application.

“Natural stone is a product of nature therefore, it is not always uniform in color, size and texture.”

Defined by its uniqueness to fit your character.

Arch Stone adds the classic notion and feel of any living space. Such versatility, it works in harmony with other materials used any residential or building structure beautifully. One of the best qualities of natural stones is that no two stones are alike. Because stone is made in nature, its colors vary, making it more beautiful.

“Natural stone is a product of nature therefore, it is not always uniform in color, size and texture.”

Note: Though colors in this brochure are as close as the actual stone as possible, photographic and printing techniques and actual viewing conditions can alter perception of color.

Uniformity of quality is not circumstantial.
A highly cost-effective broad-spectrum termiticide concentration for Soil and Wood treatments

As a soil treatment, Probuild TC
- can use water as a diluent
- no stench, odorless
- 500 ml pack can treat 1120 square feet of wood surface
- no stench, odorless
- works against important Subterranean termite species
- considered immobile in soil
- unlikely to reach the ground water
- binds with the soil effectively
- works in high pH soil
- favorable safety profile

As a soil treatment, Probuild TC
- made and widely used in the USA
- works against drywood termites, ambrosia beetles and powder-post beetles (bupok)
- cost-effective against drywood termites, ambrosia

New World Technology
411 Lt. Arriaga, San Juan, Metro Manila
+632 722 9089
Established in 1966, Tamsons Enterprises, Inc. started as a one-employee, one room affair at the third floor of the four-storey Singson Building at Plaza Moraga in downtown Manila. For starters, it introduced to the Philippine market TOX Dubel Wall Plugs of Germany, the first in what was to become a long list of successful product lines.

The company’s efficiency in marketing TOX was such that the brand has become generic to wall plugs. Intent on providing its principals with similar benefits, Tamsons has been developing, and continues to diligently cultivate the market for other products handled. Thus, Japan’s RYOBI has become a leading brand of door closers; USA’s FLUIDMASTER, the preferred name in toilet repair and Australia’s CENTOR and RAVEN, market leaders in door & window systems.

From its humble, one room beginnings, Tamsons has consistently grown to become a leading supplier of architectural, construction, plumbing and hardware products. To provide the essential framework for the further growth, the company was incorporated in 1999. Its workforce has since multiplied to over 300 people; its office, warehousing, service and distribution facilities substantially expanded; its dealers and outlets spread throughout the archipelago, serving the needs of customers nationwide.

Today, Tamsons is a major supplier of the Philippines’ top DIY outlets, and is the exclusive distributor of a wide range of world-renowned products from Japan, Australia, the United States and other Asian & European Counties.

Build it green with TÜV SÜD PSB

Increasing concern for the environment has led governments and real-estate developers to place greater emphasis on resource-efficiency and eco-friendliness alongside utility, durability and comfort.

TÜV SÜD PSB is well-equipped with the capabilities and expertise to provide building owners, developers and builders with end-to-end green building solutions. Our experience in auditing, certification and building material testing will help stakeholders build and maintain eco-friendly buildings that ensure future environmental sustainability.

To build right, contact our experts now at +63 2-687 5673 or email us at inquiries@tuv-sud-psb.ph.

HOTLINE 646-8801
“Can I Actually feel the difference between hard and soft water?”

Soft water makes a difference you can feel and see, all over the house.

In the Bathroom: Your soap and shampoo will lather better. Your hair and skin will feel noticeably cleaner, softer, and not as dry. And there will be no soap scum or mineral deposits to clean off sinks, showers, tubs and toilets.

In the Laundry: Clothes will be softer, cleaner, whiter and brighter. Plus they will last longer. Using soft water and pure soap products increases the life of clothing, towels and linens up to 33%. Without hard water service issues, washing machines last longer, too.

In the Kitchen: Dishes will clean up more easily, and be spot free, without the gray film glasses get when etched by mineral-laden water. Plus hands will feel softer and look better.

Throughout the House: Water-using appliances will last longer and run better. Why? Because hot water heaters, washing machines and dishwashers used with hard water can wear out 30% faster.

THE SADOLIN ADVANTAGE

Superior Flexibility
Sadolin products are designed to flex with the wood, improving resistance to blistering and flaking improving long term durability.

Breathability/Microporosity
Sadolin products are designed to form a 'jacket' which is waterproof yet allows the wood to breathe, preventing water penetration while preserving its natural beauty.

Easy Maintenance
Sadolin products are specially developed to weather naturally which prevents the coating from thickening and cracking, essentially preserving its finish longer enhancing the wood better over time.

Superior Heat Resistance
Conventional woodstains have a tendency to fade, Sadolin products have UV protection that prevents discoloration and weathering through the years, even in prolonged extreme outdoor exposure.
Explore Ideas in a Seamless Workflow, from Concept to Final Presentation

A high-value offering for architects and designers, Autodesk® Design Suite Premium 2012 software combines the power of AutoCAD® software with leading visual communication tools. Solutions for sketching, illustration, 3D rendering, animation, and interactive presentations help you design more creatively, communicate more clearly, and win business.

* Leading design and documentation — With new and updated tools for 3D conceptual design, model documentation, and reality capture, AutoCAD helps maximize productivity and quickly drive projects to completion.

* Award-winning design storytelling and visualization — Use Autodesk® 3ds Max® Design software for push-button rendering, animation, and 3D modeling to create cinematic-quality visualizations to communicate and sell concepts. Simulate and analyze sun, sky, and artificial lighting with daylight analysis tools.

* Easy-to-use, real-time interactive presentation tools — Transform AutoCAD designs and 3ds Max Design models into compelling imagery, movies, and interactive presentations with Autodesk® Showcase® software.

* Fully integrated design sketching and graphic communication — Use Autodesk® SketchBook® Designer software to sketch concept designs directly into AutoCAD and tap into a hybrid paint and vector workflow for exploration of design concepts and graphic communication.

* Digital sculpting and texture painting — Sculpt and paint design concepts with a higher level of detail with Autodesk® Mudbox™ digital sculpting and texture painting application.

Includes:

- AutoCAD®
- Autodesk® 3ds Max® Design
- Autodesk® Showcase®
- Autodesk® Alias® Sketch

OMNI
electrical & lighting

LED
Greener. Better.
- Last up to 6 times longer than Compact Fluorescent Lamps
- Up to 100% more energy efficient than Compact Fluorescent Lamps
- Environment friendly
  - No mercury content
  - Less carbon dioxide emissions

Extension Cords
Functionality and Safety.
- Different designs available for domestic & commercial use
- Fire retardant enclosures for safety
- Made up of quality tin/ phosphorus & bronze for enhanced electric conductivity
- Some models are equipped with overloading protection

Exhaust Fans
Breathe easy.
- 100% pure copper motor
- Anti-vibration mounting
- Equipped with thermal fuse
- Self-lubricating motor

Automatic Emergency Lights
Never be in the dark again!
- Automatic and rechargeable lamps available
- With overcharging protection Fuse protected
- Different designs available for domestic & commercial use

T5 and Reducers
Better and brighter.
- Last up to 15,000 burning hours
- Saves up to 50% of electricity consumption compared to T10 & T12 lamps
- 20% more light output
- Uses high quality triphosphor powder for enhanced color retention

Automatic Voltage Regulator
Protect your appliances.
- Overloading protection system & indicator
- Servo-motor
- Quick response (1 sec at 10% fluctuation)
- Equipped with fuse
- Multiple outlets
- With fan blowers
- With input & output indicator
